

LOKESHWARAN V

Software Engineer | Full Stack Developer | AI & Data Enthusiast | Cloud Technologies

lokeshvb30000@gmail.com | +91 99424 67795 | Coimbatore |

Portfolio: https://mr-lokeshvb.github.io/portfolio_LW/

SUMMARY

Computer Science graduate with hands-on experience in full-stack software development, AI-powered applications, data analytics, and cloud technologies. Experienced in designing and developing scalable web applications, building RESTful APIs, managing cloud-hosted databases, and integrating intelligent AI solutions into modern software products. Skilled in Python, JavaScript, SQL, React.js, Node.js, Express.js, and MongoDB, with practical experience in machine learning, computer vision, and data-driven application development. Passionate about building innovative, scalable, and user-centric solutions while continuously learning emerging technologies.

WORK EXPERIENCE

Software Development Intern at Adrasti Global Venture Builder,
Bengaluru

Dec 2025 – Jul 2026

- Developed scalable full-stack web applications using React.js, Node.js, Express.js, and MongoDB.
- Designed and integrated RESTful APIs for seamless frontend-backend communication.
- Managed cloud-hosted databases using MongoDB Atlas for secure and efficient data management.
- Implemented authentication and role-based authorization for business applications.
- Integrated AI-powered chatbot functionality to enhance customer engagement and automate support.
- Built responsive dashboards for customers, sellers, and administrators to streamline business operations.
- Collaborated with cross-functional teams following Agile development practices and Git-based version control.
- Participated in application testing, debugging, deployment, and performance optimization.

PROJECTS

AI-Powered E-Commerce Platform

React.js | Node.js | Express.js | MongoDB Atlas | REST APIs | AI Integration

Designed and developed a scalable e-commerce platform supporting customer, seller, and administrator operations through intelligent automation and secure cloud-based infrastructure.

- Developed customer, seller, and admin modules with role-based authentication.
- Designed REST APIs for product management, inventory, orders, and customer operations.
- Integrated MongoDB Atlas and Cloudinary for secure cloud storage and efficient data management.
- Implemented AI-powered chatbot functionality to improve customer support.
- Built responsive dashboards for inventory, order tracking, and business monitoring.
- Optimized application workflows through backend automation and efficient database design.

Learning Behavior Prediction System Using Eye Tracking

Python | OpenCV | Machine Learning | Computer Vision

Developed a machine learning system that predicts student engagement by analyzing eye movement patterns during online learning sessions.

- Collected and preprocessed eye-tracking datasets.
- Applied computer vision techniques for gaze detection and tracking.
- Built and evaluated machine learning models for engagement prediction.
- Generated analytical insights to support personalized learning recommendations.
- Improved understanding of data preprocessing, feature extraction, and model evaluation techniques.

College Bus Management System

HTML | CSS | JavaScript | Database

Built a transportation management application for managing student routes and schedules.

- Designed route scheduling and passenger management modules.
- Implemented role-based authentication.
- Managed transportation records through centralized database integration.
- Improved operational efficiency by digitizing manual processes.

PUBLICATIONS & CERTIFICATION

- Research outcome published in the IEEE ICAECA 2025 conference: Predicting Student Attention and Engagement Through Eye-Tracking Using Machine Learning.
(<https://ieeexplore.ieee.org/abstract/document/11012637>)
- IBM Full Stack Software Developer Professional Certificate
- AWS Academy Graduate – Data Engineering
- Eye Tracking Fundamentals
- Merit Scholarship – Three Consecutive Years

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science & Engineering Jun 2022– Apr 2025

- Kumaraguru College of Technology
- CGPA: 8.01

Diploma – Computer Science & Engineering Jun 2019 – Apr 2022

- Nanjiah Lingammal Polytechnic College
- Percentage: 96%

KEY SKILLS

- **Programming** – Python, SQL, Java, JavaScript
- **AI & Data Science** – Machine Learning, OpenCV, Data Analysis
- **Web Development** – React.js, Node.js, Express.js, HTML5, CSS3, Figma
- **Databases** – SQL, MongoDB, MongoDB Atlas, NoSQL
- **Tools** – Microsoft Excel, Git & GitHub, Google Colab, Visual Studio Code, Prompt Engineering, Codex, Augment, Rovo dev, Claude
- **Cloud** – AWS (Fundamentals), Vercel, Render, Railway
