

LOKESHWARAN V

Software Engineer | Full Stack Developer | AI & Data Enthusiast | Cloud Technologies

lokeshvb30000@gmail.com | +91 99424 67795 | Coimbatore | [Portfolio](#) | [Linkedin](#)

SUMMARY

Computer Science graduate with hands-on internship experience in Full Stack Development using React.js, Node.js, Express.js, and MongoDB. Skilled in building scalable web applications, REST APIs, cloud-based solutions, and AI-integrated applications. Passionate about software engineering, problem-solving, and continuously learning modern technologies.

KEY SKILLS

- **Programming:** Python, Java, JavaScript, SQL
- **Web Development:** React.js, Node.js, Express.js, REST APIs, HTML5, CSS3
- **Databases & Cloud:** MongoDB, MongoDB Atlas, NoSQL, AWS, Vercel, Render, Railway
- **AI & Data Science:** Machine Learning, OpenCV, Data Analysis, Prompt Engineering
- **Tools:** Git & GitHub, VS Code, Google Colab, Figma, MS Office

WORK EXPERIENCE

Software Development Intern at Adrasti Global Venture Builder, Bengaluru Dec 2025 – Jul 2026

- Developed scalable full-stack web applications using React.js, Node.js, Express.js, and MongoDB.
- Designed and integrated RESTful APIs for seamless frontend-backend communication.
- Managed cloud-hosted databases on MongoDB Atlas, implementing secure authentication and role-based authorization.
- Integrated an AI-powered chatbot to automate customer support and boost engagement.
- Built responsive dashboards for customers, sellers, and admins; collaborated cross-functionally using Agile practices and Git-based version control.

PROJECTS

AI-Powered E-Commerce Platform React.js | Node.js | Express.js | MongoDB Atlas

Developed a scalable e-commerce platform with customer, seller, and admin modules, role-based authentication, and REST APIs for products, inventory, and orders. Integrated MongoDB Atlas and Cloudinary for cloud storage, plus an AI chatbot for customer support.

Learning Behavior Prediction System Using Eye Tracking Python | OpenCV | Machine Learning

Built a machine learning system that predicts student engagement by analyzing eye-movement and gaze patterns during online learning sessions. Collected and preprocessed eye-tracking datasets, applying computer vision techniques for gaze detection, feature extraction, and model evaluation. Generated analytical insights to support personalized learning recommendations; **findings published as an IEEE ICAECA 2025 paper.** [Link](#)

PUBLICATIONS & CERTIFICATION

- Research outcome published in the IEEE ICAECA 2025 conference: Predicting Student Attention and Engagement Through Eye-Tracking Using Machine Learning.
(<https://ieeexplore.ieee.org/abstract/document/11012637>)
- IBM Full Stack Software Developer Professional Certificate – Coursera
- AWS Academy Graduate – Data Engineering
- Eye Tracking Fundamentals – Coursera
- Merit Scholarship – Three Consecutive Years

EDUCATION

B.E., Computer Science & Engineering – Kumaraguru College of Technology Jun 2022– Apr 2025

- CGPA: 8.01

Diploma, Computer Science –Nanjiah Lingammal Polytechnic College Jun 2019 – Apr 2022

- Percentage: 96%
