SKILLS

- Python, C, Java
- Software Development
- MERN Stack
- FIGMA, Canva
- Prompt Engineering
- AI-Assisted Development
- Data Analytics
- DBMS, NoSql, MongoDB
- Problem-Solving
- Cloud Computing
- AWS, Git, Api-Integrations

LANGUAGE

- English
- Tamil
- Kanada(basic)

CERTIFICATIONS

- AWS Academy Graduate – Data Engineering (EduSkills, 2025)
- IBM Full Stack Software Developer (Coursera, 2025)
- Eye Tracking Fundamentals (Coursera, 2024)
- Merit Scholarship – Three consecutive years

LOKESHWARAN V

SUMMARY

Full Stack Developer with expertise in transforming ideas into production-ready applications through modern web technologies, cloud deployment, and AI-enhanced development practices. Experienced in developing scalable platforms, integrating databases and APIs, managing deployments, and optimizing software workflows. Passionate about building efficient, user-focused digital solutions while continuously adapting to emerging technologies and industry trends.

WORK EXPERIENCE

Software Full-time Intern

Adrasti Global Venture Builder, Bengaluru

Dec 2025 to Present

- Contributed to the development of an AI-powered e-commerce platform to improve personalization and customer engagement.
- Utilized AI-assisted development and prompt engineering techniques to accelerate feature implementation and code optimization.
- Integrated MongoDB Atlas for secure and scalable backend data, AI chatbot with API's and Admin managing dashboard.
- Built and enhanced application modules using the MERN stack.
- Collaborated with cross-functional teams to design data-driven and AI-enhanced user experiences.

EDUCATION

Kumaraguru College of Technology

Bachelor of Computer Science & Engineering – 80%

2022 – 2025

Nanjiah Lingammal Polytechnic College

Diploma in Computer Science & Engineering – 96%

2019 – 2022

PROJECTS

Learning Behavior Prediction System Using Eye Tracking

- Built a system to predict student engagement using eye-tracking data.
- Implemented real-time analysis using Python, OpenCV, and machine learning models.
- Enabled early detection of disengagement to support personalized learning systems.

KCT Bus Service System

- Developed a web-based bus management system for scheduling, ticketing, and passenger management.
- Implemented authentication and role-based access control for system security.
- Built using HTML, CSS, JavaScript and backend database integration.
